Smart Lockbox for Home

Smart Lockbox for Home

A small lockbox can easily solve the following problems

Super waste of time

Stand at the door for at least an hour waiting for a spare key.

Inconvenient

Friends come early with joy, but they have to impatiently wait outside.

Unsafe

The spare key hidden under the foot mat is often lost.

Expensive and complicated

The smart lock is too expensive. And it may not fit my door. It's too troublesome.

Smart Lockbox for Business

Smart Lockbox for Business

A small lockbox can easily improve your work efficiency

**If you are
an apartment owner**

Your tenant can only hold a valid code during the lease term.

**If you are
an apartment manager**

Send out a one-time code to a cleaning service provider remotely, without waiting forever.

**If you are
a real estate-agent**

Getting the one-time code sent by the house owner remotely, Do not waste your time on the way.

**If you are
a shop-keeper**

Your employees will have their own code to enter the shop, and you can have the records of the door opening.

Smart Lockbox L1

- Remote Access
- Multiple Ways to Unlock
- Safer than Safer
- Bigger than Bigger

Easy Password Management

- **Remote Access**

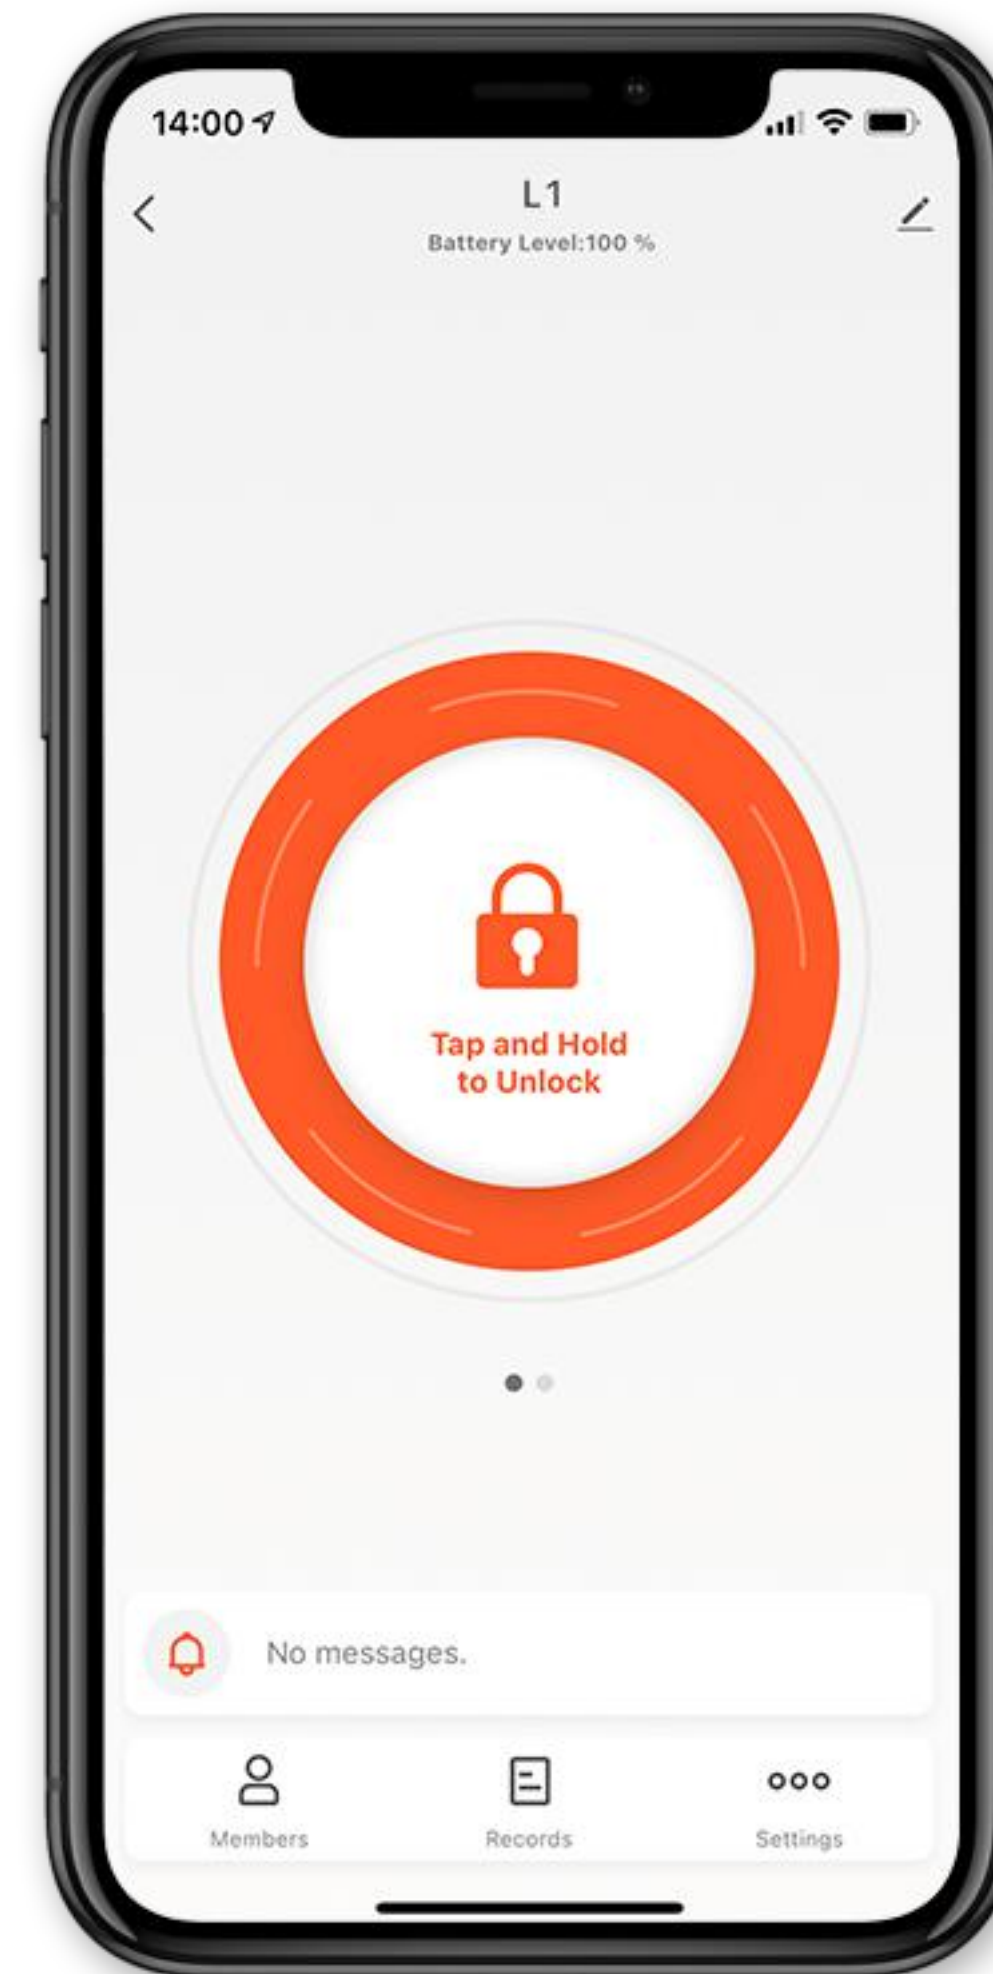

You can send the code at all times and all places without internet

- **One-time Code + Temporary Code**

One-time code automatically invalidated once the door is opened; Temporary code is used for regularly cleaning services

- **User 's Access Logs**

Check out when, who and how the door is opened

Multiple Ways to Unlock

Unlock Via App

Unlock Via Code

Safer than Safer

Water proof

Weatherproof IPX5, effectively protected from rain and shine.

Solid

Made of SPCC material, which is commonly used in automotive and construction industries.

Anti-Peep

Hiding your real password in the virtual pin code.

Bigger than Bigger

You can store your house keys,
credit cards and even car keys in it.
We are bigger than most of keyboxes
in the market.
